

MOST FIRES ARE STARTED BY FROGS

- What is happening here?
 - Why is the frog on fire?
 - Can it control the fire?
 - How is the frog feeling?
 - The title is 'Most fires are started by frogs'. Why do frogs start fires? How do they start fires? Write an explanation of this phenomenon.
 - Who puts the fires out?
 - Is there anything that humans can do to prevent these fires?
 - Write instructions for preventing and/or extinguishing frog fires.
-
- In real life, what are the common causes of forest fires?
 - What can be done to prevent them?
